

## 2<sup>nd</sup>

### Blue Flame Evo Tri-Oval £240

This was comfortably the most powerful can of the 13 when it came to testing them with the baffle in. It averaged an extra 4.98bhp over the standard can, which was 0.91bhp more than any other can. Power slipped back slightly when the baffle was removed, dropping to an average of 4.46bhp, but it scores highly in both power tests. It's not so hot in the fuelling stakes, where the average air-fuel ratio was significantly leaner than ideal before the fuel injection was remapped. The average ratio before was 13.8:1 and the Power Commander brought this down to 13.2:1 in the remapping process. With the fuel injection sorted out and the baffle out, the Blue Flame provided a test-topping 6.24bhp boost over the standard can.

- Power gain (with baffle): 8/10
- Power gain (without baffle): 7/10
- Effect on fuelling: 5/10
- Total: 20/30
- Weight: 2365g
- Baffle removal: Twin outlets. Re-usable circlip holds in top baffle and there's a circlip and removable blanking plate in the lower outlet.
- Contact: 01695 733100
